

CHANDRA SHEKHAR

FULL STACK DEV

Curious builder with startup experience and 20+ shipped projects.

Worked across freelance and early-stage environments I know no one reads this anyway.

Built and failed a startup, gaining real product and execution experience.

Experience

FOUNDER/ Entire Team *Hungrr.in*

June 2025 - AUG 2025

- Learned that user behavior is the hardest problem people don't change habits just because the product is "better."
- Validated that execution speed matters more than ideas — shipping fast exposed flaws quicker than planning ever did.
- Understood that distribution > product, getting users is harder than building the product itself.

Full Stack Intern *THEMOONDEVs*

MAY 2024 - Nov 2024

- Built and improved real product features focused on clean UI and production-ready code
- Collaborated with a team in a startup environment, shipping fast and learning how real products are built.
- Took ideas from zero to live features, owning the flow from concept to deployment.

Education

Bachelor of Computer Applications (BCA)

Shri Shankaracharya Mahavidyalaya

2023-2026
